

# ADVAN S.T.

# I AM HIGH PERFORMANCE.

## FOR HIGH PERFORMANCE LUXURY

Sport utility vehicles have climbed out of the mud and are racing down the highway with some of the world's most prestigious badges on their bonnets; the Porsche Cayenne, Mercedes M Class and the BMW X5.

The requirements for performance machines like these are extreme and the ADVAN S.T. was designed to exceed them. Created specifically to address both the high-speed capabilities and the load capacity of the new performance SUVs, the ADVAN S.T. features steel belts and rugged steel sidewall reinforcement, for unprecedented control.

### Twin wide grooves

- Increased drainage on wet surfaces.

### W-shaped multi-directional grooves

Red line shows the flow of water

### Technical Features

### Benefits

#### Silica compound

Provides traction in hot, dry conditions as well as cool, wet conditions

#### Rayon carcass and steel sidewall reinforcement

Strength and durability reducing heat build up

#### W-shaped multi directional grooves

Excellent grip in wet and dry conditions

#### Large tread blocks

Outstanding handling at high speeds

#### Solid Centre Rib

Outstanding steering response and stability at high speeds

#### 5 Pitch Variation

Reduces driving noise
