

FOR THOSE WHO DO IT ALL

LONG-LASTING, PUNCTURE RESISTANT AND TOUGH TYRES ENABLING YOU TO TAKE ON ANY TERRAIN.

The Geolandar AT/S 4WD tyre pushes the performance boundaries on and off the pavement, despite its conservative looking tread design.

According to 4WD Action magazine (No. 167) it gives drivers confidence with sure-footed and predictable handling. It excels in sand driving, high speed gravel driving and climbing steep bush tracks. On road it handles well with low tyre noise. Unlike other noisy all terrain tyres, it doesn't spoil the refinement and luxury of modern four wheel drives.

3-Dimensional Sipes

- Improves road performance
- Reduces uneven wear

Multi-Step Tread Block Design

- Off-road traction
- Clears mud and dirt

5 Pitch Variation

Technical Features

High mileage silica compound

A full nylon cap ply

5 pitch variation tread design

Zigzag sipes

4 straight grooves

Benefits

Improved wet grip and high mileage capability
500 UTQG treadwear rating

Reinforces tread and protects against sharp rocks/stones

Low tyre noise and reduces uneven wear

Reduced tread deformation and enhanced braking and handling

Evacuates water for better performance in wet conditions

ROAD HAZARD PROTECTION

The Yokohama Road Hazard Protection covers drivers from unexpected road hazard damage both on and off the road. So if the tyres are damaged they'll be repaired or replaced for free*.

*Some age and wear conditions apply.

What is Road Hazard Protection?

The Yokohama Road Hazard Protection covers drivers from unexpected road hazard damage both on and off the road. This includes:

- Staking
- Impact Fractures
- Cuts
- Accidental Kerb Damage

How much does it cost?

The Yokohama Road Hazard Warranty is offered FREE with the purchase of 2 or more Yokohama Geolandar tyres from the following list:

- Geolandar SUV HT Eco (G055)
- Geolandar HTS (G051)
- Geolandar HT (G056)
- Geolandar ATS (G012)

How does it work?

The certificate provides free puncture repair where there is at least 50% of the original tread remaining and wear-based replacement on non-repairable tyres as follows:

- If the tyre has greater than 75% of the original tread remaining Yokohama will replace the tyre free of charge.
- If the tyre has less than 75% but greater than 50% of the original tread remaining Yokohama will replace the tyre at a pro-rata cost. The driver only has to pay for the tread already worn off the tyre as a percentage of the retail purchase price.
- If there is less than 50% of the original tread remaining the tyre will no longer be covered.

Where am I covered?

The Road Hazard Certificate gives you Australia-wide protection both on and off the road.
